BitHarvest: Revitalizing the Bitcoin Landscape for the Mining Industry

BitHarvest
PRESS RELEASE
Dubai, United Arab Emirates — In a rapidly evolving market, BitHarvest is leading the charge in revitalizing the Bitcoin mining landscape. For years, Bitcoin's market dynamics have been closely tied to a traditional four-year cycle, marked by halving events that trigger predictable phases of growth and decline. However, the market is now undergoing significant changes, driven by technological advancements and shifting investor sentiment. BitHarvest is pioneering new approaches for miners to stay profitable.

“DIGITAL GOLD”

IN A COUNTERCYCLICAL ECONOMY

During the multiple Eastern European crises

Amid rising geopolitical tensions in Eastern Europe, Bitcoin has been seen as a safe asset for investors.

Particularly, after Russia's invasion of Ukraine, the price of Bitcoin has been on the rise, indicating its status as a haven during economic difficulties.

COVID-19 Period

In 2020, despite the severe economic downturn in the United States, the price of Bitcoin achieved a 35% annual growth by the end of the year.

By October 2020, the price of Bitcoin had already increased by 50% to \$10,800.

On December 16th, the price of Bitcoin surpassed \$20,000, reaching a new high, and within a few days, it exceeded \$23,000.

Current rise in contrary economic trend

The global economic downturn is evident, and conflicts are escalating in various regions. In this situation, Bitcoin has once again risen against the trend, highlighting its status as “digital gold” in a contrary economic cycle.

THE HISTORICAL VALUE OF **BITCOIN**

First Time of Value Ownership

In 2010, Bitcoin had its first public transaction when two pizzas were purchased for 10,000 BTC, which is now considered a significant milestone in the actual value of Bitcoin.

In 2011, Bitcoin gained more widespread attention, and its value reached \$1 for the first time.

Value Substitute in Financial Crisis

Although Bitcoin's creation coincided with the 2008 financial crisis, it was not created as a direct response to the crisis.

Bitcoin's anonymous creator, Satoshi Nakamoto, started writing the Bitcoin whitepaper in early 2007, over a year before the financial crisis hit mainstream markets.

Volatility & Regulation

During the period of 2014-2016, the price of Bitcoin experienced significant volatility, partly due to the collapse of the Mt. Gox exchange. Governments around the world started paying attention to Bitcoin and discussing its regulation.

Steady Growth & Institutionalization

In recent years, Bitcoin has been gradually accepted by more traditional financial institutions, with some large banks and investment funds entering the Bitcoin market.

The underlying technology of Bitcoin, blockchain, has also been applied in various industries, from financial services to supply chain management.

Mainstream Acceptance & Price Surge

In 2017, the price of Bitcoin experienced an unprecedented surge, reaching a historical high of nearly \$20,000.

That same year, Bitcoin futures were introduced on major exchanges, marking Bitcoin's entry into the mainstream financial market.

CERTAINTY OF WEALTH

Long-Term Appreciation

- Although Bitcoin's price is highly volatile in the short term, it has shown significant potential for long-term appreciation. Many early investors have witnessed substantial wealth growth through Bitcoin.

Technology & Market Maturity

- With the maturation of blockchain technology and the development of the cryptocurrency market, Bitcoin, as the market leader, has gained stability and recognition.

Diversification of Investment Portfolio

- Although Bitcoin's price is highly volatile in the short term, it has shown significant potential for long-term appreciation. Many early investors have witnessed substantial wealth growth through Bitcoin.

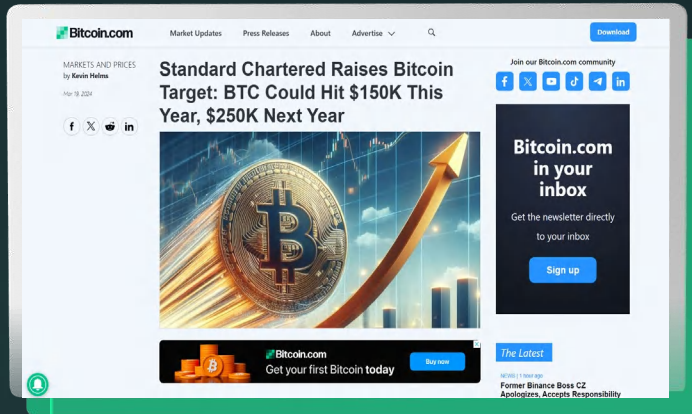

Bitcoin Ecosystem Boom

- With the growing popularity of the BitHarvest ecosystem, both Eastern and Western capital are eagerly investing in the Bitcoin ecosystem, leading to frequent market entries. This will coincide with the fourth halving event and bring about a major boom in the Bitcoin ecosystem.

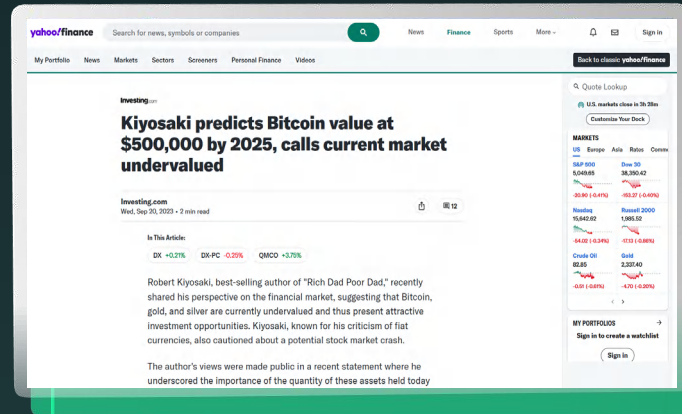

BITCOIN PRICE PROJECTION

Bitcoin.com

Standard Chartered Bank, one of the major multinational banks in the UK, raise Bitcoin target that BTC could hit \$150,000 in 2024, \$250,000 in 2025.

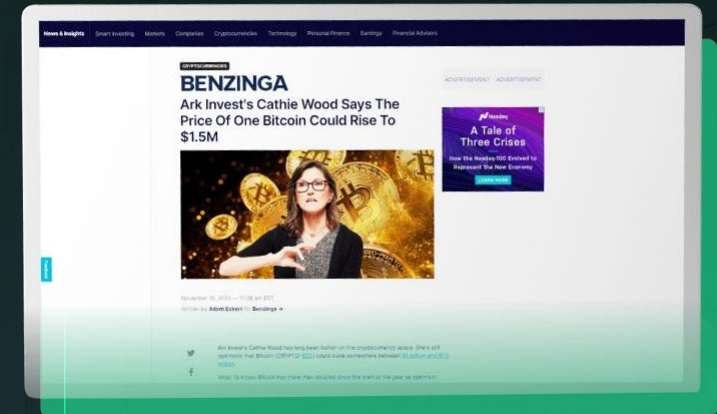

Published **Mar 19, 2024**

CNBC

Robert Kiyosaki, the author of Rich Dad Poor Dad, and an American businessman, predicts that Bitcoin could reach \$500,000 by 2025.

Published **Sep 20, 2023**

Nasdaq

Cathie Wood from Ark Investment Management predicts that the price of one Bitcoin could reach \$1.5 million by 2030.

Published **Nov 15, 2023**

STORIES, TESTIMONIES & RECOGNITION

National Adoption

In 2022, several countries took significant steps to strengthen the adoption of Bitcoin and decentralized technologies.

Major events included El Salvador's new law introducing Bitcoin bonds, the Central African Republic adopting Bitcoin as an official currency, the collaboration between Tether and Lugano (one of the largest cities in Switzerland), and the creation of Bitcoin Island in the Philippines.

Growth in Bitcoin Wallet Usage

As of 2022, there are over 80 million cryptocurrency wallets worldwide, a significant increase compared to 5.78 million in January 2016.

It is projected that the number of Bitcoin wallet users will increase from 32 million in 2021 to an estimated 200 million by 2024.

Major Exchange Platform Users

Blockchain.com reached 81 million users in 2022; Binance is projected to have 150 million registered users by 2023.

Coinbase had 98 million active users in 2023.

Usage of Diverse Wallets

Various wallets are widely used, such as Trust Wallet with over 60 million global users, MetaMask with over 30 million monthly active users, and Ledger Live hardware wallets with over 1.5 million active users.

LOGAN LEE

CEO & CO-FOUNDER

Logan Lee decade-long career in the financial industry has significantly impacted his expertise in data analysis, strategic partnerships, and international business development.

He believes that establishing a solid technological foundation is essential for serving clients responsibly and aims to deliver the right products that ensure long-term value to investors.

LENNI HERLIN

CTO & CO-FOUNDER

Lenni Herlin is a distinguished genius in the blockchain sectors, known for his pivotal role as the former Ethereum Core Developer and the ecosystem architecture of Northern Bitcoin AG.

His career is characterized by a deep commitment to fostering innovation and exploring the decentralize implications of blockchain technology. Through his leadership and logical insights, Lenni has significantly influenced the development of new technologies and nurtured a generation of Bitcoiners, making a lasting impact on the tech landscape.

DATUK DR MARK ESHVAREN

CHIEF OPERATING OFFICER

Datuk Dr Mark is a visionary leader and influential figure in the global business arena. As the Founder and Chairman of Private Equity Management Corporation (license by SC Malaysia), he has established a reputation for transformative leadership across diverse industries.

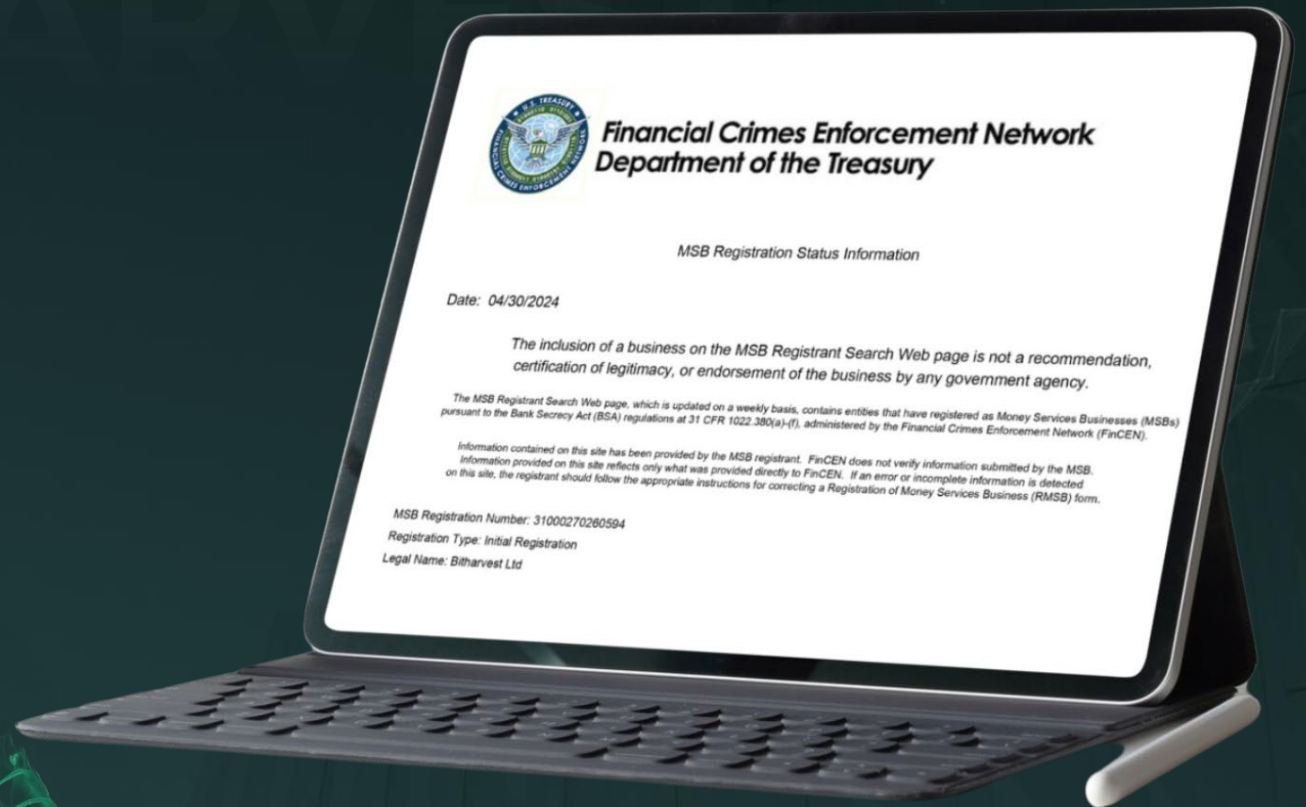

Known for his strategic foresight and groundbreaking contributions, Datuk Dr Mark has significantly impacted international markets. Through his leadership and mentorship, he has guided countless entrepreneurs worldwide, leaving a lasting legacy in the financial and corporate sectors.

US MSB LICENSE

The MSB license is a crucial regulatory framework established by FinCEN. It encompasses various financial services including currency exchange, international remittance, and other money services operations, particularly focusing on the emerging sector of digital and virtual currencies. Companies engaged in the above-related businesses must apply for an MSB license before they can operate legally.

CORE TECHNOLOGY BITHASH

BITHARVEST TECHNOLOGY ADVANTAGES

1. Data Aggregation & Optimization Analysis

Hash Data Aggregation: Utilizing advanced data aggregation techniques, the system collects and integrates hash data from the past Bitcoin network, forming a comprehensive dataset.

Big Data Analysis: Using big data analysis techniques to deeply mine and pattern recognize the collected hash data, revealing potential mining optimization opportunities.

2. Algorithm Integration & Performance Enhancement

Algorithm Integration: Integrating multiple advanced algorithms, including but not limited to machine learning, optimization algorithms, and prediction models, to improve mining efficiency and output.

Performance Optimization: Through these algorithms, the Booster can intelligently adjust mining strategies to adapt to changing network difficulty and market conditions.

3. Enhancement of Mining Efficiency

Efficiency Enhancement Technology: By combining historical data analysis and real-time network monitoring, the Booster continuously optimizes its mining operations to maximize hash rate and resource utilization efficiency.

Adaptive Algorithm Adjustment: The system can automatically adjust mining parameters based on real-time data and predictive results, ensuring optimal performance in any mining environment.

4. Energy Efficiency & Environmental Protection

Energy-saving Algorithm: Reducing energy consumption through optimized algorithms, achieving efficient mining while reducing environmental impact.

Green Mining Technology: While improving mining efficiency, BitHarvest is committed to achieving green mining and reducing carbon footprint.

BITBOOSTER BITCOIN MINING BOOSTER

Traditional Mining

Traditional miners require large investments to set up mining machines and compete with global mining farms

VS

BitBooster Mining

BitHarvest Miners do not need to set up mining machines; they share computational power with mining farms through BIT Booster. By utilizing the accelerated speed of the AI BitHash system, miners earn additional revenue.

✓ No need for high-cost purchases of mining machines.

WHY CHOOSE US

01 Right Track

Certainly, here's a concise summary in one sentence: According to Chainalysis's September 2022 report, emerging countries, including middle to low-income nations like Vietnam, the Philippines, and India, lead in cryptocurrency adoption, with a presence in the top 20 countries spanning various income levels, including high-income nations like the United States and the United Kingdom.

03 Right Team

Our team consists of experienced technical experts, financial analysts, and market strategists. Team members have practical experience in the cryptocurrency and blockchain industry, enabling them to accurately grasp market dynamics. The team is dedicated to innovation, constantly seeking new methods to improve service quality and user experience.

02 Right Time

Now is an opportune moment to enter the cryptocurrency market, with advancing technology, clearer regulations, and the potential for innovative investments. Cryptocurrencies are gaining recognition as a store of value and investment, especially amidst global economic uncertainty, and the upcoming fourth Bitcoin halving event adds further intrigue.

04 Right Product

Our Bitcoin Mining Booster meet the diverse closed-loop requirements of the market. The products are built on the latest technology to ensure security, efficiency, and user-friendliness. Product design always centers around user needs and experiences, aiming to provide the best user experience and value.

4. Allow internal transfers

Limited to purchase booster

REFERRAL INCOME

You

You referred Client A

For any booster purchased by A, you can receive referral income.

If you have 22.5% referral income

Client A

Client A referred Client B

For any booster purchased by B, you can receive overriding referral income.

Purchasing 1 Booster
Investor 5% referral income

Client B

Purchasing 1 Booster

A's Referral Income

$$900\text{USDT} \times 5\% = 45\text{USDT}$$

Your's Referral Income

$$900\text{USDT} \times 17.5\% = 157.50\text{USDT}$$

Tips

Referral income is distributed based on the amount of USDT of the client's purchase of BitBooster.

RANKING INCOME

- Your Ranking Income $\triangleright 0.01533 \text{ ₿} \times 2\% \times 70\% = 0.0003066 \text{ ₿}$
- $\triangleright 0.01533 \text{ ₿} \times 2\% \times 30\% \times \$70,000 = 6.43 \text{ USDT}$

Tips

Ranking income is distributed based on the client's Bitcoins mining output.

SAME RANK INCOME

System will simulate

Alice's 6 Stars – 5 Stars Ranking
Income x 10% = Same Rank Income

System will simulate

Alice's 5 Stars Ranking Income x10%
= Same Rank Income

▼

If her 6 Stars Total Ranking Income has 1.5 ₿
If her 5 Stars Total Ranking Income has 0.5 ₿

Alice's Same Rank Income

▼

$$0.5 \text{ ₿} \times 10\% = 0.05 \text{ ₿}$$

Your Same Rank Income

▼

$$(1.5 \text{ ₿} - 0.5 \text{ ₿}) \times 10\% = 0.1 \text{ ₿}$$

Tips

Same rank income not including referral income.

6 STARS BUSINESS DEVELOPMENT PLAN

Round	1	2	3	4	5	6	7	8	9	10
Recruits	3	9	27	81	243	729	2,187			
Boosters	15	45	135	405	1,215	3,645	10,935			
Rank	1 Star		2 Stars	3 Stars	4 Stars	5 Stars	6 Stars			

33 Duplicate

If you introduce **3 people** to purchase **5 Boosters** each and duplicate it every week, you can reach 6 Stars in 7 weeks. Utilize company resources and company consultants to help you achieve your ranking goals.

16,395 Boosters

Est. Monthly Output **50.26707 ₿ Bitcoin** x **2% Ranking Income**
 = **1.0053414 ₿ / Month** ≈ **\$70,374**

This simulation calculates the lowest overriding ranking income and does not include referral bonus.

Est. Monthly Output **50.26707 ₿ Bitcoin**
 x **5% Ranking Income**

= **2.5133535 ₿ / Month**
 ≈ **\$175,935**

This simulation calculates the potential 5% overriding ranking income and does not include referral bonus.

Note

Based on an output of 0.00000073 ₿ per TH, the Booster is projected to generate approximately 0.003066 ₿ per month, assuming a 200% acceleration rate for predictive purposes. This estimate is calculated with a Bitcoin price of \$70,000 and should be used for reference only. It does not account for potential impacts from changes in mining difficulty or equipment efficiency, which could affect earnings. Increased difficulty and technological advancements may impact operational efficiency. Actual earnings may vary, and investors are advised to conduct thorough risk assessments before making decisions.

SUMMARY

BITHARVEST

Development Strategy

Cooperate with global mining farms to obtain the right to use computing power.

Increase Community wealth goals

Develop and implement Bitcoin sidechains.

Profit Promise

Provide global investors with more efficient Bitcoin Booster mining.

Bitcoin is a bank that exists in cyberspace, powered by immutable software. It provides billions of people around the world with a simple and secure savings account that is economical and convenient.
